- Flat deck wagons.
- Farm bus wagons (for pick your own)

COMPLETE PACKING & GRADING LINES:

We do complete plant layout designs & drawings both for our own equipment or to help our customers integrate a new piece of equipment into their existing lines. Our design engineers will come and take site measurements and provide you with a complete 3D layout of your setup as shown below.

ALL EQUIPMENT IS AVAILABLE IN STAINLESS OR MILD STEEL AND IS CUSTOM DESIGNED AND BUILT TO SUIT EACH CUSTOMERS NEEDS

MARKETS SERVED

Our fruit and vegetable handling design and fabrication experience covers a wide range of produce. We have designed and built equipment for products such as; carrots, onions, potatoes, spinach, garlic, mushrooms, pickles, apples, celery and more. Our customers range from processors to farmers to pack houses.

DESIGN

We use the latest in 3D CAD software to design each piece of equipment we build. This enables us to see the finished product before fabrication ever begins eliminating costly mistakes due to unforeseen interference.

OUR REPUTATION

We have been designing custom vegetable handling equipment for over 20 years. During this time we have acquired a wide range of experience and expertise. Often times we will work along with customers that have an idea of what they want and together we develop a solution to their specific requirements. We are committed to quality and customer satisfaction, we are not finished a job until the customer is satisfied.
