BULK FILLING SEEDER HOPPER

SELF CONTAINED

- Hand pump, no hoses to hook up!
- Custom design to mount directly onto any seeder!

QUICK AND EASY

- One time installation on seeder unit!
- Dump several pails of seed into hopper!
- Only 10 - 15 pumps to raise hopper!
- Variable speed lowering control knob!

SAVE ON SEED

- No spillage while feeding into large hopper!
- Never overfill small hoppers!

SAVE TIME

- Quicker to feed one large hopper than several small ones!
- Fill seed bins several times with one filling of large hopper!
- Easy clean-out detachable funnel.

TESTIMONIAL

By using this machine I have cut my seeding time in half and can now choose the best time of day to seed. The Bulk Filling Seeder Hopper has very little maintenance and eliminates binding over to fill individual hoppers. Its a real time and back saver.

Dan Collins, E & J Collins Ltd.

HAND PUMP TO
RAISE AND LOWER

The seeder mounted hand pump eliminates the need for messy hydraulic hoses to be connected to the remotes of the tractor. It also allows the operator to raise and lower the bulk seed bin from the back of the seeder right where the bin is filled. The hand pump only takes a few seconds to pump up to the fully raised position and allows variable speed precision control while lower the bulk seed bin.
